

Prevention of Medical Kidnapping

URGENT: Draft a medical power of attorney **ASAP** and have your medical wishes clearly defined; Make copies and give to trusted friends or family members.

By all means stay out of the hospital. This should be a last resort. They have become a kill zone.

If it were me, I would write on my chest in black sharpie the following:

“NO Ventilator, NO Remdesivir, NO Covid19 injection. Honor My Medical POA – (Power of Attorney) Take several photos of this with your face included.

If you are given an I.V., Question everything that goes into it. One patient was given Fentanyl and was no longer able to communicate.

If your medical power of attorney is kicked out of the hospital, have them contact the Sheriff immediately (**Not the Police**) to escort your medical POA back into the facility for a **“Welfare Check”** because they are there to make sure your medical wishes are adhered to.

If they dishonor the rights of the patient, your Medical Power of Attorney must **IMMEDIATELY** File an Emergency Injunction with the District Court clerk accompanied by a supporting statement by the Sheriff.

The emergency injunction should be in front of a Judge or Magistrate in less than 24 hours for review.

If your dependent is medically kidnapped, you have all authority as the lawful guardian to all medical care and treatment to your dependent under your supervision.
